Areas of Specialization

L B Industrial Systems specializes in the processing, conveying and storage of Bulk Materials.

- Classification
- Blending
- Conditioning
- Feeding systems
- Mechanical conveying
- Pneumatic conveying
- Storage silos
- Fluidization
- Loading systems

We have extensive experience with the long distance, dense phase pneumatic conveying of fly ash.

Additional Resources

- Two licensed Professional Engineers on staff
- Pneumatic Conveying laboratory
- Texas based field crew with tool trailer

Company Information

L B Industrial Systems is a Texas based LLC established in 2001 with multi state capabilities.

CAPABILITY STATEMENT

Services Provided

L B Industrial Systems is an EPC contractor serving the ash, cement and granular materials industries. We offer any combination of the following services:

Engineering

- Material testing
- Existing equipment assessment
- Feasibility studies
- Civil
- Structural
- Mechanical
- Electrical
- Controls
- Drawings & documentation
- Startup and performance testing
- Training

Equipment supply

- Plant equipment, structures, piping, tanks, instruments, controls
- Spare parts

Construction

- Complete new plant installation
- Retrofit
- Refurbishment

Past Performance

- 20 years of service to cement, ash marketing and power companies.
- Supplied primary dry ash conveying systems for some of the largest power plants in the USA.
- Pioneered vacuum recovery of fly ash from large, flat bottom storage silos and domes.
- Extended the envelope for long distance, dense phase pneumatic conveying.
- Assessed and upgraded competitor's systems.
- Provided support for customer's proprietary processes under NDAs.
- Please refer to our Project Experience List for more information.
